

Power Plant Water Box Application

Field Tested. Application Driven.

A Kinetrol USA Midwest Distributor specified a Kinetrol actuator on an extremely high cycle rate application in a coal fired power plant. The application is known as the “water box” and is part of the condenser vacuum-break system. The valve and actuator operate an amazing 2880 times per day - thats over 1 million cycles per year!

Installed: 4.5 Years
Cycles: 2880 per day
No Maintenance To Date
